

IIoT Starter Kit with TeamViewer-IoT Agent & Portal

Edge Gateway | Industrial sensors | TeamViewer IoT for visualizing sensor data | with OPC UA-Support

Easy-to-use, plug-and-play

Get the IIoT Starter Kit for just 690€

Ready for Industry 4.0 in 15 minutes

In an increasingly complex IoT ecosystem, many companies struggle to implement end-to-end IoT solutions, especially in the field of Industrial IoT (IIoT). With the IIoT Starter Kit including TeamViewer-IoT Agent & Portal you will be „Ready for Industry 4.0“ in just 15 minutes - without any intervention in the control or reprogramming of existing machines. Prepare yourself for the ever higher standards regarding status monitoring and forward-looking machine and system maintenance.

Plug&play

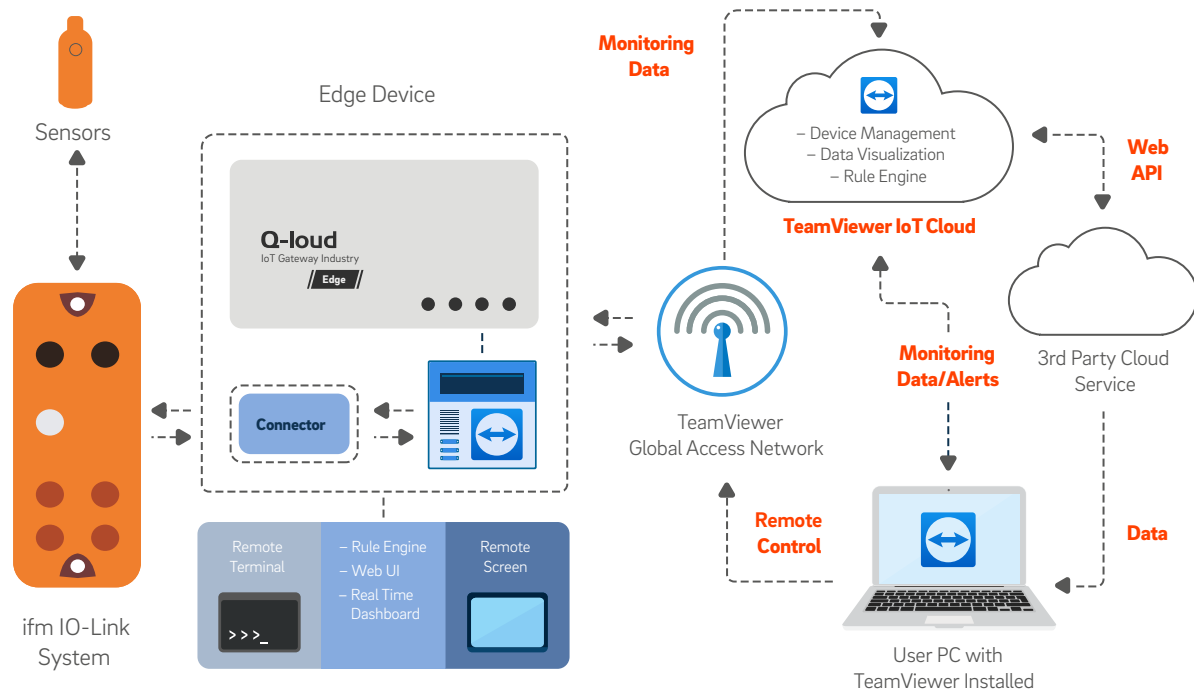

The IIoT Starter Kit is plug-and-play and already includes the Q-loud IoT Gateway Industry „Edge“, industrial sensor for condition monitoring and predictive maintenance, mobile connectivity for a secure end-to-end connection from the sensor to the cloud and TeamViewer IoT as web frontend for visualizing and managing sensor data.

Extendable Apps

With optional TeamViewer services you can easily implement additional services for remote access & operations, digital twin „on edge“ or remote alarming.

The IIoT Starter Kit in detail

- 1x Q-loud IoT Industry Gateway „Edge“
- 1x ifm 4-Port IO-Link Master AL1350
- 1x ifm IO-Link vibration sensor VVB001
- 2x power supplies with international adaptors
- 1x sensor and 1x Ethernet cable
- 1x TeamViewer IoT-account usage for six months with option to continue as a regular TeamViewer IoT-account after test period
- 1x M2M-SIM-card for 2G/3G/4G mobile network and 500 MB of free Internet traffic (Additional traffic contingent of 500 MB can be purchased)
